Wisdom of the Ancients

Why do kings and queens wear crowns? Why are we fascinated with the brilliance and sparkle of quartz crystals and gemstones? Is their value worth more than money?

Wisdom of The Ancients is indisputable, and that is where I searched for, and found, the answers. I discovered that wearing quartz crystals and gemstones to promote health, wealth, and happiness is an ancient tradition practiced all over the world. I found the answers in sacred writings like, The Bible, ancient manuscripts and tribal teachings handed down from one generation to next by masters and shaman. In all these writings, *there is a common belief* that wearing quartz crystals and gemstones create the energy necessary to promote good health, self-confidence, wisdom, a sense of well-being, empowerment and spirituality. Well, wouldn't that explain why kings and queens wear crowns?

And after years of testing the ancient teachings on this subject, I know, and believe, the reason we are so attracted to quartz crystals and gemstones is because *we intuitively know about the benefits* we experience by wearing them! Therefore, trust your intuition when making your selection.

The Awesome Quartz Crystal

How ever many gemstones one needs to wear in order to balance one's energy, always include a quartz crystal because Quartz Crystals expand, transform and conduct energy! They are mentioned four times in The Bible - Job 28:17; Isaiah 54:12; Revelation 4:6; and my most favorite, Ezekiel 1:22. "And the likeness of the firmament above the heads of the living creatures was like the color of an awesome crystal, stretched out over their heads."
